The New Mexico Department of Agriculture (NMDA) is an agriculture producer-consumer service and regulatory department placed under the New Mexico State University Board of Regents. NMDA has five divisions: agricultural and environmental services; agricultural programs and resources; marketing and development; standards and consumer services; veterinary diagnostics services. <http://nmdaweb.nmsu.edu>.

This is a Congressional Hunger Center “Hunger Free Community Report,” prepared by Jimmy Purvis, Bill Emerson National Hunger Fellow <http://www.hungercenter.org/>

### Acknowledgements

Our appreciation goes out to all the **farmers and food service personnel** that filled out our surveys. Your information has made this work possible. Vitally important to the success of this project were **Craig Mapel**, New Mexico Department of Agriculture; **Lē Adams**, Farm to Table; **I. Miley Gonzalez**, New Mexico Department of Agriculture; **Marion Kalb**, Program Director, National Farm to School Program, Community Food Security Coalition; **Dwayne C. Nelson**, Director, National Agricultural Statistics Service; **Pauline Raia**, Program Manager, NMHSD-ISD/Community Development and Commodities Bureau; **Mary Ann McCann**, Food Service Director, Taos Municipal Schools; **volunteers from St. John’s College; The New Mexico School Nutrition Association; Nicole Alvarado**, Bill Emerson National Hunger Fellow.

# Introduction

---

*Markets created by school feeding and nutrition programs represent the most stable markets for New Mexico's small and mid-sized farmers. Opening these markets to local farmers will lead to a healthier farm economy, while at the same time leading to healthier eating habits and healthier children.*

This New Mexico Farm to School Directory seeks to expand the ways in which New Mexico schools and farmers can partner together in order to mutually benefit each other, with local food supplying the needs of local citizens. Markets created by school feeding and nutrition programs, which will always exist, represent the most stable markets for New Mexico's small and mid-sized farmers. Opening these markets to local farmers will lead to a healthier farm economy, while at the same time leading to healthier eating habits and healthier children.

While many New Mexicans consume more calories than they need, much of it is in the form of sugars and fats.<sup>1</sup> A recent survey of New Mexican adults indicates that only 23% of adults consume the recommended five or more servings of fruits and vegetables every day, placing New Mexico below an already low national average.<sup>2</sup> Furthermore, according to the Center for Disease Control, 56.5% of New Mexicans are either overweight or obese,<sup>3</sup> based on Body Mass Index (BMI).<sup>4</sup> Although there is no system in place to monitor overweight and obesity among New Mexico's youth, national data shows that 19% of children 6-11, and 17% of adolescents aged 16-19 are overweight.<sup>5</sup>

In 2000, direct medical expenditures attributed to obesity in New Mexico reached \$324 Million, a figure that does not take into account indirect expenditures such as absence from work and lost productivity. As the population of overweight and obese individuals continues to grow, and as the overall population of New Mexico continues to expand, public health costs can only be expected to increase.

Increased health and death risks are also associated with being overweight or obese, and both strongly correlate with increased rates of diabetes, cardiovascular disease, asthma, arthritis, some cancers and poor health status. These types of chronic diseases are responsible for six out of every ten deaths in New Mexico.<sup>6</sup>

Over the past few decades, the average farm size in the United States has steadily increased to 441 acres, a development that has led to greater average production per farm, as well as decreasing profit margins for all farmers. While the average farm size in New Mexico is 2,954 acres, a discrepancy attributed to the reliance on the cattle and feed industries, 53% of New Mexico farms are fewer than 100 acres.<sup>7</sup> The smaller size of these farms makes it very difficult to remain profitable in an increasingly global market, and New Mexico's smaller farm operations have watched traditional markets such as large grocery retailers and wholesalers virtually disappear due

to increased consolidation. The result has been an excess of fruits and vegetables produced, but with few markets much of the product goes to waste.

Many of these farmers have, at the same time, seen an ever-increasing number of direct marketing opportunities appear. Many small and mid-sized farms are now reliant on local and regional markets, such as farmers' markets, schools and other institutions, community supported agriculture programs and other direct markets.

Despite this product diversity, 68% of New Mexico farms earn less than \$9,999 per year, a dire situation for a state that employs 13% of its working population in farm and farm-related jobs.<sup>8</sup> Even though the agricultural market is now experiencing a growing interest from consumers who want to “buy local,” without continued state and consumer support for New Mexico's small and mid-sized farming operations, New Mexico faces increased rural poverty and economic stagnation.

This directory hopes to capitalize on these health and farm trends by putting “excess” produce to good use, simultaneously creating regional markets for farmers while giving consumers what they both want and need—fresh, local, healthy food. It is our hope that this directory will be of use to both farmers and food service personnel alike, helping to strengthen existing relationships and create new ones.

Included are listings of 78 New Mexico farmers and the foods they produce, as well as contact information for 175 food service directors at New Mexico's public, private, charter and BIA school districts. Where food service directors have returned surveys and expressed interest in having their name shared with local producers, the names of the specific products they expressed interest in are indicated.

This directory is an ongoing project and it is our intent to periodically update the information listed. For more information or to be included in future directories please contact Lē Adams at Farm to Table, (505) 473-1004.

1. A 1997 survey reported that, nationally, children were getting 50% or their calories from fat and sugar (35% and 15%, respectively), while only 1% of children were consuming healthy foods. # 2007 Farm to School survey

*In Farm to Table's 2007 survey of New Mexico food service directors, 50 food service directors indicated that they would purchase from New Mexico farmers if price and quality were competitive. These 50 food service directors represent 370 schools and 185,493 students, equaling 53% of New Mexico's approximately 348,820 K-12 students. This market alone, if food service directors were to purchase the majority of their fruits and vegetables locally, would buy much of the state's supply of fruits and vegetables.*

In fall of 2006, Farm to Table, in partnership with the New Mexico Department of Agriculture, conducted a mail survey of 682 New Mexico farmers and 175 food service directors for New Mexico's public, private, charter and BIA school districts. The goal of the survey was to assess both the supply and demand sides of increasing Farm to School programs within New Mexico, as well as to gauge current purchasing practices among New Mexico's schools.

Criteria were selected, under recommendations from the New Mexico Department of Agriculture, for fruit, vegetable and nut producers that have the capacity to sell to local schools (Table 1). Dairy and cattle operations were excluded for the purpose of this survey because schools can obtain the majority of these products for well under market value from the Commodity Supplemental Food Program.

Of the 682 surveys sent to farmers, 150 completed surveys were returned, resulting in a 22% response rate, which is considered a very successful rate for a mail survey. Of these 150 responses, 96 (64%) indicated that they would be interested in selling their product to local schools and institutions, and 75 (50%) indicated that they are either looking for additional markets or would like to change the way that they sell their product.

Additionally, the project confirmed that it is primarily small and mid-sized fruit, vegetable and nut producers that are most interested in selling to schools, as an overwhelming number of respondents represented small to mid-sized farm operations.<sup>1</sup>

**Table 1: Criteria for selecting fruit, vegetable and nut producers**

Crop type	Annual gross income	Acres in production
Fruit	No requirement	2 or more
Vegetable	\$5,000	1 or more
Nuts	No requirement	No requirement
<b>Total number of farmers contacted:</b>		682

Among New Mexico’s schools, surveys were sent to 175 food service directors in the state, representing most of New Mexico’s public, private, charter and BIA school districts (Table 2).

**Table 2:** Number of surveys mailed per type of institution

<b>Type of institution</b>	<b>Number contacted</b>
Public/Charter school	106
Private school (only those served by public food service programs)	26
Bureau of Indian Affairs school	43
<b>Total</b>	<b>175</b>

The response rate from food service directors was very favorable, as 60 of those sent surveys returned them, equaling a response rate of 34%, very high for a mail survey. Of these 60 survey respondents, 50 (83%) indicated that they would purchase from New Mexico farmers if price and quality were competitive. These 50 food service directors represent 370 schools and 185,493 students, equaling 53% of New Mexico’s 348,820 K-12 students.

The information gained from this survey will be presented in a number of different formats, and it is our hope that this information will be relevant to farmers, food service directors, community members and policy makers alike. In addition to this directory, other relevant publications are the New Mexico Farm to School Report, a Farm to School Video, and manuals for farmers and food service directors looking to become involved in Farm to School programs.

1. Interview with Craig Mapel, New Mexico Department of Agriculture, January 16, 2007.

# How to use this directory

---

*Included are listings of 78 New Mexico farmers and the foods they produce, as well as contact information for 175 food service directors at New Mexico's public, private, charter and BLA school districts.*

## Section One

This section includes a list of all farmers who wished to have a listing in the directory, listed alphabetically by county. Each listing includes the farmer's name, mailing address, phone number, email (when given), and what they produce. Crop information is listed under two headings; "product" indicates the crops the farmer grows that have historically been sold to New Mexico schools, whereas "other" indicates any additional product that the farmer may produce. *Note: a designation as "other" should not imply that the farmer produces any less of that product.*

## Section Two

This section includes a list of all farmers, organized according to product. Each farmer is listed alphabetically according to county, and each listing includes the farmer's name and their farm name. Please look up their contact information in Section One. Products listed as "other" are included collectively in one section at the end.

## Section Three

This section includes a listing of public, private, charter and BIA school districts that are serviced by the food service directors of public school districts, listed alphabetically by county. Where food service directors have returned surveys and expressed interest in sharing their information with local producers, it is indicated what specific products they are most interested in. *This list was provided by the New Mexico HSD-ISD/Community Development & Commodities Bureau.*

---

This directory is an ongoing project and it is our intent to periodically update the information listed. For more information or to be included in future directories please contact Lē Adams at Farm to Table, 505.473.1004.

Farm to Table FAQs

# New Mexico institutional directory map

First Number: **Supply**—All farmers who indicated interest in selling to local schools and wished to be included in the directory (84 farmers/33 counties)

Second Number: **Demand**—All food service directors who indicated interest in purchasing from local producers (if price and quality were competitive) (46 directors/33 counties)

In Parentheses: Total number of food service directors that were sent surveys in that county

# Farm to School FAQs

---

## The necessity of Farm to School programs

### **What is Farm to School?**

Farm to School programs purchase and feature farm fresh foods such as fruits, vegetables, beans and dairy in their menus. These purchases are from local farmers, expanding markets for farmers. Other aspects frequently in Farm to School programs include: nutrition lessons, cooking classes, school gardens, farm visits and compost/recycling programs. These education programs help to extend the learning that starts with changes in the school cafeteria.

### **What does “locally grown” mean?**

Local usually refers to food grown nearby, and can be measured in a number of ways. In many Farm to School contexts, however, it refers to food grown within a given state, in this case New Mexico.

### **How do Farm to School programs benefit local farmers?**

Despite above average income generated by large, American agriculture companies, most mid to small sized farms in the United States are currently in a state of economic crisis. The farmer share of every food dollar spent on food has dropped from 41 cents in 1950 to 19 cents in 2002.<sup>1</sup>

Despite these national changes, four of New Mexico’s 33 counties generate at least 20% of their income from farming,<sup>2</sup> and 13% of New Mexico’s population is employed in farm and farm-related jobs.<sup>3</sup>

Farm to School programs represent the most stable markets for New Mexico farmers; they are permanent institutions with recurring funding. Such programs not only have the potential to generate significant income for farmers in New Mexico but would also circulate money within local economies.

The potential for significant sales for farmers exists. In North Carolina, farmers sold \$500,000 worth of fruits and vegetables to state schools in 2004–2005. In New Mexico, \$400,000 worth of local products was sold to New Mexico schools in 2005.

In Farm to Table’s 2007 survey of New Mexico farmers, 64% of those who responded indicated that they would be willing to sell their product to local schools and institutions.

### **Why is locally produced food better?**

Food produced locally has been harvested at peak freshness and delivered to the consumer within a short time period. It is therefore often of the highest quality and highest nutritive value. Studies

indicate that people are more likely to consume fruits and vegetables when they are of high quality. Locally purchased produce also supports the local economy.

### **Why is there a need for increased fresh fruit and vegetable consumption in schools?**

While many New Mexican children consume more calories than they need, many of them are not eating enough fruit and vegetables. The 2005 New Mexico Youth Risk and Resiliency survey indicates that only 17.8% of New Mexico high schoolers consume the recommended five or more servings of fruits and vegetables every day, compared with a national average of 20.1%.<sup>4</sup>

Moreover, 56.5% of New Mexicans are either overweight or obese, and both conditions are strongly correlated with increased rates of cardiovascular disease, asthma, arthritis, some cancers and poor health status. These types of chronic diseases are responsible for six out of every ten deaths in New Mexico.<sup>5</sup> Direct health expenditures attributed to overweight and obesity each year in New Mexico are estimated at \$324 million.<sup>6</sup>

Schools, with the unique ability to impact almost every child in the state, are the dominant institution in New Mexico with the ability to directly address these rising health concerns by instilling healthy eating behaviors at a young age.

### **Nutrition and health in New Mexico**

- Current annual direct medical expenditures attributed to obesity in New Mexico (2000): \$324 Million
- Percent of New Mexicans either overweight or obese (2002): 56.5%
- Percentage of New Mexico adults that consume the recommended 5 servings or more of fruits and vegetables every day (2003): 23%

### **How do Farm to School programs contribute to children's health?**

Farm to School programs instill healthy and balanced

eating habits at a young age and in an institutional setting, setting up behaviors that will last a lifetime.

Research into existing Farm to School programs indicates that students choose significantly more servings of fruits and vegetables when given the choice of high quality, local, fresh produce, especially when this availability is linked to an educational activity.

Additionally, research shows that a poor diet and lack of physical activity influence a child's ability to learn and decrease motivation and attentiveness.

### **Will kids actually eat fruits and vegetables?**

Several studies indicate that students will eat more fruits and vegetables when they have easy access to a variety of local, fresh options. Using a 24-hour recall methodology, data from a pilot program at 3 elementary schools in Los Angeles clearly showed that Farm to School programs increased fruit and vegetable consumption by over 40 percent or by one serving per day in children, as well as reduced the overall fat intake of the students.

## **Farm to School programs**

### **How widespread are Farm to School programs?**

There are currently over 1000 operational Farm to School programs in the United States, in over 35 states.

### **What New Mexico grown crops could be served in New Mexico schools?**

In Farm to Table's 2007 survey, school food service buyers indicated interest in purchasing a wide variety of products. Some of the most popular products include: apples, melons, peaches, tomatoes, lettuce, cucumbers, carrots, potatoes and onions. Other products also included items such as dry pinto beans and whole wheat flour.

### **Since the growing season and the school year don't have much overlap, how can Farm to School work in New Mexico?**

Two of the main limitations to Farm to School are that New Mexico farmers can not be in year-round production and that the New Mexican climate isn't suited to grow many of the products (e.g. oranges) that school food buyers want.

There are, however, many local products that are both already grown in New Mexico and harvested in the spring and fall, including apples, root crops and salad greens.

Many farmers are now using hoop houses and other season extension infrastructure, as well as cold storage, to extend the time that they can provide products.

### **Is more food preparation needed for fresh produce?**

Yes, although this can be solved in a variety of ways. Preparation can be done on the school side, in a cafeteria that's equipped with knives, sectioners and other equipment. It can also be completed by farmers, and some farmers have now begun to get involved in minimal processing.

### **What are the liability concerns of selling to New Mexico schools?**

Any farmer wishing to sell their product to a local school needs to have \$1 million in liability insurance for their farm, which costs approximately \$500 per year to obtain.

### **Which New Mexico schools have Farm to School programs?**

The most established programs in New Mexico exist in the Albuquerque, Santa Fe and Taos public schools. There are many other schools, however, that have purchased from New Mexico farmers. In Farm to Table's 2007 survey of food service directors, 17 districts reported that they had purchased from New Mexico farmers within the past year.

All parties agree that Farm to School programs have helped their students become more aware of healthy food choices and believe that these experiences will help inform a lifetime of healthy eating choices.

### **Are other schools interested in Farm to School?**

Based on Farm to Table's 2007 survey of food service directors in New Mexico, 83% of those who responded indicated that they would purchase locally if price and quality are competitive.

### **In what ways can local food be used by schools?**

Locally grown food can be used any way that other food products are used: as part of a breakfast, hot lunch, a salad bar, or as a snack.

## **Farm economy in New Mexico**

- Average farmer share of the food dollar (2002): 19 cents
- Number of counties in New Mexico with at least 10% of total annual income from farming (2000): 9
- Percentage of farms in New Mexico with annual income less than \$10,000 (2006): 68.3%
- Per-capita income in New Mexico (2004): \$26,184

### **Where do schools get money to buy locally grown produce for Farm to School?**

School food buyers can purchase local produce with the same federal reimbursement money that they use to purchase all of their food items. In fact, local food can oftentimes be less expensive to purchase, especially if purchased in season.

There is also a range of private and public monies available, including both federal and state grants. Some programs have also been started with the assistance of non-profit organizations, utilizing private and foundation grant monies.

## **Overcoming barriers**

### **Is there federal assistance that schools can get to begin Farm to School programs?**

The 2002 federal Farm Bill contains language that directs the USDA to encourage school food buyers to buy from regional farmers when possible. A federal farm to cafeteria assistance program has been authorized but not yet funded.

### **What have other states done to institute successful Farm to School programs?**

Some states have found that a coordinator position has been helpful in starting Farm to School programs. Oklahoma, Connecticut, Massachusetts and Washington have coordinators, as do some school districts, such as the Santa Fe school district.

In North Carolina, the state provided \$1,000 start-up grants to 50 schools, for one year, to make local produce purchases, and \$500 in the second year. The program is now operating successfully without grant funding.

## School Meal economy

- Total amount spent on food each year in the National School Lunch Program: \$16 billion
- Total number of school lunches served in New Mexico each year: over 35 million
- Average number of school lunches served each day in New Mexico: 211,793

### What are some of the barriers to beginning Farm to School programs in New Mexico?

For the farmer, this could involve challenges concerning infrastructure, including cold storage and packing capabilities, as well as distribution and additional labor requirements. There also needs to be a sufficient supply of product to sell to some of the larger school districts. Farmers need information concerning which schools are interested in making local purchases and assistance with making procurement both convenient and profitable. Other issues involve quality and health standards and maintenance of Good Agricultural Practices.

For schools, purchasers are required to stay within budget, create additional contracts and involve alternative models of delivery. School food buyers also need assistance in creating contacts with local suppliers, local procurement and assurance of health and quality standards.

### How can these barriers be overcome?

Many barriers could be overcome through communication between interested school districts and those with existing programs.

Additionally, the USDA Fresh Fruit and Vegetable Pilot Program has recently begun in New Mexico, and 25 schools in the state, as well as the Zuni Pueblo, now receive monies to provide fresh fruit and vegetable snacks to all children in their school.

If New Mexicans were willing to commit some of the state's resources to provide initial start-up capital, Farm to School programs could be self-sustaining within a few short years.<sup>7</sup>

# Farm to Table FAQs

---

## What is Farm to Table?

Farm to Table is a 501(c)(3) non-profit organization based in Santa Fe, New Mexico that focuses on linking local food and fiber production to local needs by improving communities' access to nutritious, affordable, locally grown and culturally significant foods.

## How was Farm to Table created?

Farm to Table was created in 1996 as the Friends of the Farmers' Markets (FOFM), and initially focused on farmers' market development in New Mexico. In 2001, FOFM was renamed to Farm to Table and expanded its mission to include the current program areas and vision.

## What is Farm to Table's Mission Statement?

To promote locally based agriculture through education, community outreach and networking. Farm to Table enhances marketing opportunities for farmers; encourages family farming, farmers' markets and the preservation of agricultural traditions; influences public policy; and, furthers understanding of the links between farming, food, health and local economies.

## In what areas does Farm to Table focus?

Farm to Table works in three areas; (1) improving marketing opportunities for farmers and ranchers, (2) coordinating food and agriculture policy initiatives, and (3) educating children and adults about the importance of supporting local agriculture and of knowing where their food comes from.

## What are Farm to Table's programs?

Farm to Table has three main program areas:

### 1) *New Mexico Food and Agriculture Policy Council*

Farm to Table initiated the Policy Council in 2002 to provide a forum for a broad-based group of organizations, agencies and individuals to work on food and agriculture issues. The Policy Council's membership includes representatives from health, social services, agriculture and environment. Committees educate one another, their respective organizations, agencies and policy makers about program and policy issues that strengthen agriculture, health and local economies.

### 2) *Farm to School/Farm to Cafeteria*

Since 2001, Farm to Table and its partners have been instrumental in the development of Farm to Cafeteria programs, linking farmers and their fresh foods with meals and snacks in school cafeterias. Currently, the Santa Fe, Albuquerque and Taos school districts are purchasing NM grown fruits and vegetables, with more than 100,000 schoolchildren benefiting from these programs. Farm to Table is helping to expand Farm to Cafeteria programs to New Mexico's rural communities. The organization also links New Mexico students to local farms, school gardens, and healthy eating through classroom and offsite education.

### 3) *Southwest Marketing Network (SWMN)*

The purpose of the SWMN is to improve the economic viability of limited resource farmers, ranchers and organizations in the Southwest (NM, CO, UT, AZ and Tribal Lands). Farmers and ranchers are provided with business management tools, marketing strategies, technical and financial assistance, crop insurance information and peer examples needed to improve their marketing success. Community-based organizations receive technical assistance to develop farmers' markets and programs that improve access to healthy foods. SWMN also provides quarterly newsletters to 3,400 participants and holds an annual conference. For information about this conference please contact Farm to Table.

## How is Farm to Table supported?

Farm to Table operates with a number of grants, from a variety of federal, state, and local agencies and organizations.

### Sample surveys

# Sample surveys

---

**Description:** The two surveys utilized for this report were developed by Jimmy Purvis and Lē Adams, Farm to Table, and Craig Mapel, New Mexico Department of Agriculture, as a way to assess the interest and feasibility of increasing sales of New Mexico grown fruit and vegetables to local schools and institutions.

The school food survey consists of 22 substantive questions and primarily focuses on procurement issues: type of produce purchased, frequency of purchase, units of purchase and concerns when purchasing school food.

The farmer survey consists of 17 questions and focuses on types of produce grown, current market strategies, as well as the capacity to increase or change current markets.

# Survey of School Food Service Providers

1. How many students are enrolled in your school district? \_\_\_\_\_

2. How many K-12 schools are in your school district? \_\_\_\_\_

3. How many students, on average, participate in your school meals program? \_\_\_\_\_

4. In which county is your school district located? \_\_\_\_\_

5. Do you serve food all year round (e.g. summer lunch program, all-year school)?

Yes       No

6. Does your school use salad bars?

Yes       No

6a. If yes and you represent a school district, how many schools in each category currently have salad bars?

High Schools \_\_\_\_\_ Middle Schools \_\_\_\_\_ Elementary schools \_\_\_\_\_

7. Approximately what percent of menu items are: ( $a+b+c$  must total 100%)

Prepared at the service site/school kitchen \_\_\_\_\_%

Prepared at a central district processing site \_\_\_\_\_%

Prepared off site by a vendor/caterer and delivered \_\_\_\_\_%

(Assume the site at which a food is “prepared” is where the most ingredients are brought together for the final dish. With the exception of fresh fruits and vegetables, heating a food is not considered “preparation.”)

8. How many days in advance of actual food preparation do you order fresh produce?

\_\_\_\_\_ days

9. Do you have a prime vendor from whom you purchase the majority of your food items?

Yes       No

12a. If yes, is the company New Mexico owned?

Yes       No

10. Do you have a contract with a food vendor that prohibits you from making local purchases?

Yes       No

11. What were the top 5 WHOLE FRESH FRUITS OR VEGETABLES you purchased in fiscal year 2005-06 (please include summer food services)? (e.g. whole potatoes, whole apples, fresh strawberries)

a.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

b.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

c.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

d.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

e.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

12. What were the top 5 PREPACKAGED FRESH FRUITS OR VEGETABLES you purchased in fiscal year 2005-06 (please include summer food services)? (e.g. shredded lettuce, carrot sticks)

a.

Name of Fruit or Vegetable: (e.g. salad mix, carrot sticks)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

b.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

c.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

d.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

e.

Name of Fruit or Vegetable: (e.g. whole, potatoes, apples, pears)	
Unit of Purchase: (e.g. case, pound, head, count, dozen)	Average Number of Units Purchased at One Time: (e.g. 2 cases, 10 pounds, 5 heads)
Frequency of Purchase: (e.g. weekly, monthly)	Average Cost per Unit: (e.g. \$19/case, \$.50/pound, \$1/head)

**13. Have you purchased foods from a local food producer in the last year?**

*(If no, skip to question #14)*

- Yes       No

13a. If yes, what products have you purchased?

Fruits

- Apples       Pears       Peaches       Plums  
 Melons       Cherries       Berries

Vegetables

- Chile       Tomatoes       Carrots       Sweet Corn       Green Beans  
 Squash       Lettuce       Onions       Spinach       Cucumbers  
 Okra       Potatoes       Pumpkins       Cabbage  
 Mixed Salad Greens

Nuts/Beans/Grains

- Pistachios       Peanuts       Dry Pinto Beans  
 Whole Wheat Flour       Other (please describe) \_\_\_\_\_

13b. Did you see an increase in fruit and vegetable consumption by students when serving locally produced foods?

- Yes       No

13c. Would you buy products from local producers again?

- Yes       No       Not Sure

13d. If no, please describe why: *(Check all that apply)*

- Inconsistent quality  
 Not reliable  
 Too much effort  
 Price  
 Other: please describe \_\_\_\_\_

**14. I would purchase food directly from a local producer if price and quality were competitive and a source was available:**

- Strongly agree       Agree       Disagree       Strongly disagree       Uncertain

**15. My school would be interested in buying these foods from local producers. *(Check all that apply)***

Fruits

- Apples       Pears       Peaches       Plums  
 Melons       Cherries       Berries

Vegetables

- Chile       Tomatoes       Carrots       Sweet Corn       Green Beans  
 Squash       Lettuce       Onions       Spinach       Cucumbers  
 Okra       Potatoes       Pumpkins       Cabbage  
 Mixed Salad Greens

Nuts/Beans/Grains

- Pistachios       Peanuts       Dry Pinto Beans  
 Whole Wheat Flour       Other (please describe) \_\_\_\_\_

16. Please check information that would be helpful for you in making local food purchasing decisions. *(Check all that apply)*

- Information of local food programs from around the country
- Lists of suppliers and products for local sources
- Assistance in developing a system for buying from multiple sources
- A list of when local foods are available in New Mexico (availability chart)
- School-tested recipes and menus that incorporate local foods
- Broker indication on order sheet where foods come from (place of origin)

17. What concerns do you have in regard to purchasing locally produced foods? *(Check all that apply)*

- Adequate Volume
- Reliable Supply
- Payment Arrangement
- Delivery Considerations
- Prime Vendor Considerations (potential threat to existing relationships)
- Seasonal availability of New Mexico fruits and vegetables
- Cost
- Package Consistency
- Quality
- Other \_\_\_\_\_

18. What would primarily motivate you to serve locally grown or processed food in your schools? *(Check all that apply)*

- More products available that are partially processed (carrot sticks, salad mix)
- One place to order from multiple farmers (i.e. farmer cooperatives)
- Lower transportation costs
- Financial incentives for purchasing local food
- Additional facilities/ equipment/ staff in the school district to prepare food
- Interest from parents or community members
- Ability to purchase in small quantities/special varieties
- Support from the school board
- Other \_\_\_\_\_

19. What barriers currently prevent you from purchasing foods directly from local producers? *(Check all that apply)*

- Budget
- State spending caps on discretionary purchases
- Institutional (internal) purchasing policies
- Lack of local producers in area from whom to purchase
- I don't know any farmers
- Lack of products available during certain times of the year
- Convenience (one-stop shopping with regular broker)
- Lack staff/facilities to handle large amounts of fresh produce
- Other \_\_\_\_\_

*Farm to Table is working to link local food growers and school food service operations in New Mexico. In order to link your institution's food services with local producers, and to find out more about these connections, please provide your name and contact information below. This information will only be used to link you with local producers, as a way to contact you and/or to send more information about local food connections in your area, and will be kept separate from your survey information.*

**20. Are you interested in connecting your school with local food producers?**

Yes       No

**21. If yes, may we share your name with producers in your area?**

Yes       No

**22. Contact Information:**

Name: \_\_\_\_\_

School or School District Name: \_\_\_\_\_

Street Address: \_\_\_\_\_

City: \_\_\_\_\_ Zip: \_\_\_\_\_

Telephone: \_\_\_\_\_ Fax: \_\_\_\_\_

Title: \_\_\_\_\_

Email: \_\_\_\_\_

*Thank you taking the time to fill out this survey. Your participation is very important to us. Please place the completed survey in the enclosed envelope and return to Farm to Table. If you have any additional comments regarding this survey or purchasing locally produced foods, feel free to write them here.*

# Survey of Fruit, Vegetable, and Nut Producers

## 1. What are your primary agricultural products?

### Fruits

- |                                  |                                 |                                   |
|----------------------------------|---------------------------------|-----------------------------------|
| <input type="checkbox"/> Apples  | <input type="checkbox"/> Pears  | <input type="checkbox"/> Peaches  |
| <input type="checkbox"/> Plums   | <input type="checkbox"/> Melons | <input type="checkbox"/> Cherries |
| <input type="checkbox"/> Berries |                                 |                                   |

### Vegetables

- |                                     |   |                                   |
|-------------------------------------|---|-----------------------------------|
| <input type="checkbox"/> Chile      | <input type="checkbox"/> Tomatoes           | <input type="checkbox"/> Carrots  |
| <input type="checkbox"/> Sweet Corn | <input type="checkbox"/> Green Beans        | <input type="checkbox"/> Squash   |
| <input type="checkbox"/> Lettuce    | <input type="checkbox"/> Mixed Salad Greens | <input type="checkbox"/> Spinach  |
| <input type="checkbox"/> Okra       | <input type="checkbox"/> Cucumbers          | <input type="checkbox"/> Potatoes |
| <input type="checkbox"/> Pumpkins   | <input type="checkbox"/> Cabbage            | <input type="checkbox"/> Onions   |

### Nuts/Beans/Grains:

- |  |                                  |  |
|--|----------------------------------|--|
| <input type="checkbox"/> Pistachios                    | <input type="checkbox"/> Peanuts | <input type="checkbox"/> Dry Pinto Beans |
| <input type="checkbox"/> Whole Wheat Flour             |                                  |  |
| <input type="checkbox"/> Other (please describe) _____ |                                  |  |

## 2. What value-added products do you produce?

\_\_\_\_\_

## 3. Do you participate in any form of group sales?

- Yes       No

a. If yes, does this group arrange for product delivery?

b. Name of group \_\_\_\_\_

## 4. How would you describe your operation? (Check all that apply)

- I sell all my product and am not looking for new markets
- I can sell most of my product, but am looking for additional markets
- I would like to change the way that I sell my product
- Given the rising costs to deliver my product, I want to sell only to outlets within \_\_\_\_ miles of my place.
- I would require additional season extension infrastructure in order to produce crops year round.
- Certified organic
- Uncertified Organic
- Certified any other label—please specify \_\_\_\_\_

5. Approximately what percent of your overall sales are at: *(combined must total 100%)*

- a. Broker/Packing House \_\_\_\_\_%
- b. Schools and Institutions \_\_\_\_\_%
- c. Local Stores \_\_\_\_\_%

*The Southwest Marketing Network is a collaboration that seeks to ensure that farmers in New Mexico, Utah, Colorado and Arizona have access to the latest technical, financial and marketing information, as well as personal contacts with successful farm marketers. The Network is a collaboration of Farm to Table, Western Rural Development Center, the National Center for Appropriate Technology, the Navajo Nation Department of Agriculture and higher education universities. We provide quarterly newsletters, an annual conference, and specialized trainings.*

12. Do you receive the Southwest Marketing Network Newsletter?

- Yes
- No

13. Would you like to receive this newsletter in the future?

- Yes
- No

*Our goal for this survey is to receive the opinions of as many agricultural producers in the state of New Mexico as possible. Because it is difficult to keep up-to-date lists on all the agricultural producers in the state we are relying on farmers such as you to aid us in capturing the opinions of as many farmers as possible.*

14. Do you know of other farmers who should get this survey? Please list their contact information below.

Farmer Name: \_\_\_\_\_ Phone Number: \_\_\_\_\_

Farmer Name: \_\_\_\_\_ Phone Number: \_\_\_\_\_

*When complete, the directory of institutional buyers and sellers will serve as a resource guide to help facilitate interactions with local buyers and to increase markets for New Mexico agricultural products.*

**15. Would you like to have a listing in this directory?**

Yes       No

**16. Would you like us to mail you a copy of the completed Directory of Institutional Buyers and Sellers?**

Yes       No
